

REUSABLE DEHUMIDIFIER

User Guide

In-car condensation is a nuisance. It restricts your vision and can also cause rust, mildew and that musty damp smell. This dehumidifier sorts the problem out in an ingeniously simple way. This fabric outer cover is filled with activated bentonite which absorbs up to 40% of its weight in moisture, helping to prevent the inside of windows getting misted or iced in the winter.

Practical economical and durable, after about two months you can dry it on a radiator or in an oven and it's restored to as-new efficiency.

Please note that when the circle on the product changes from Blue to Pink, it needs recharging for the most optimal performance.

Safety Information

Position the dehumidifier where condensation builds up most. Place it on a solid, flat surface. To regenerate dry on a radiator (approx 24hrs) or preheat the oven to 80°C and leave to dry for an hour. This product can also be recharged using the microwave. Set it to 600W and leave for no longer than 6 minutes. Store in a dry and ventilated area, away from fire and heat. We recommend that you dry out the product every 6 weeks.

WARNING

When using the product, basic precautions should always be followed, which include the following;

1. Keep out of reach of children. Do not let children play with the product or any outer packaging.
2. Do not use if the outer bag is damaged, and never allow the contents to leak out.
3. Never touch the contents of the bag. In the event of this, immediately flush the affected area with cold, clean water and seek medical assistance if the burning persists.
4. Never ingest the contents of the bag. If this occurs, seek immediate medical treatment.
5. Do not expose the product to a naked flame.
7. Do not cover the product. Do not use near foods.
8. Do not position in any place which may obstruct the view of the driver.
